

AGENZIA CREATIVA DRONI

WHO WE ARE

We are a team specialized in aerial cinematography with **FPV drones** (First Person View) — an innovative technology that offers immersive, dynamic perspectives to enhance any visual project.

By combining **technical expertise** and **creative vision**, we produce original, high-impact content tailored to each client's needs.

Our certified, licensed, and insured pilots ensure professionalism, safety, and top-quality results in every production.

WHO WE ARE

Alessandro Bava

As an **Engineer** Alessandro brings to FPVFlow his expertise in **design, development, and technical experimentation**.

An FPV pilot since 2015, he also builds our drone fleet and develops the custom systems used in our productions.

He loves high-speed challenges, dynamic chase scenes, and the pursuit of new technological solutions.

Certified STS-01 and STS-02 pilot

Veronica Furfaro

FPV pilot since 2020, Veronica combines technical precision and **artistic sensitivity** to craft visually striking footage.

She handles storytelling, **post-production**, and flight direction, shaping smooth and immersive visuals — even in tight or complex spaces.

She loves turning every flight into a visual narrative that conveys atmosphere and emotion.

Certified STS-01 and STS-02 pilot

WHAT WE DO

We design, build, and operate our FPV drone fleet in-house, blending advanced piloting skills with a creative approach.

We produce **immersive aerial videos** across multiple fields: sports events, advertising, tourism, music, art, and institutional communication.

Our **end-to-end service** covers every stage of production:

- Concept development
- FPV drone filming
- Editing and color grading
- Optimization for social media and digital platforms

INNOVATION BEYOND FLIGHT

Beyond aerial filming, we develop **custom technological solutions**, combining maker skills with digital innovation.

Our services include:

- **Custom 3D printing** for creative products, installations, and interactive accessories
- **NFC gadgets** for storytelling, promotions, and digital experiences
- **FPV kits** for enthusiasts and professionals
- **Flight lessons** and technical consulting

Each service is modular and scalable, from single deliverables to full-scale integrated productions.

WHY FPV

FPV (First Person View) drones enable unique, fluid, and immersive shots that turn every project into a **cinematic experience**.

Using a headset, the pilot controls every movement axis with absolute precision, achieving spectacular and dynamic footage.

With a diverse fleet and **STS-01 and STS-02 certification**, we operate safely and efficiently in complex environments — both **indoors** and **outdoors**, even in non-standard conditions.

We can operate in:

- **Tight spaces** (showrooms, backstage areas, theaters, installations, villas)
- Crowded or **public** scenarios
- Adverse weather conditions (snow, **rain**, wind)
- Dynamic **chases** (cars, motorcycles, athletes, aircraft)

With FPV footage you can:

- **Engage** your audience through immersive and spectacular perspectives
- **Stand out** with dynamic, innovative content unlike traditional videos
- **Showcase** spaces and products through smooth, natural movement
- **Convey emotion** and energy, ideal for events, commercials, sports, and visual storytelling

OUR DRONES

A versatile fleet for every shooting scenario.

Each drone is designed and fine-tuned for specific contexts:

- **Ultralight** models for indoor flights and close proximity to people
- Cinewhoops with **protected propellers** for delicate environments
- Mavic 3 for traditional, high-quality aerial shots
- **Waterproof** and long-range models for extreme conditions

Our productions feature GoPro 5.3K (up to 240FPS), Insta360, and professional-grade sensors to ensure crisp, stunning images in any situation.

SAFETY

We are certified pilots holding STS-01 and STS-02 authorizations for **complex flight scenarios** (restricted zones, urban areas, etc.).

We handle ENAC permits, local authorizations, and coordination with public or private entities.

Safety is an integral part of every flight:

- **Full insurance coverage**
- **Coordination** with other operators
- Fast, compliant operations under **European regulations**

PROJECTS

 **Arena di Verona** | Backstage and promo video for the 100th Opera Festival

 **Costa Smeralda** | Seaplane chase along the coastline

 **Dolcenduro** | Enduro bike race across the Ligurian Alps

 **TrailParade** | Sports event promotion

 **Prato Nevoso** | Snow event & Europe Free Ski Cup

 **FAI San Fruttuoso** | Aerials for cultural and tourism promotion

 **Stupinigi DJ Set** | Night event aftermovie with videomapping

 **Cornuatech** | Immersive techno party in the Ligurian woods
